LIST OF EXPERIMENTS

S.NO.	OBJECTIVE
	Basic C++, variables, data input-output
1	Write a program to perform arithmetic operations
2	Write a program to check whether a number is even or odd
3	Write a program to print multiplication table of a given number
	C++ program using concept of structure
4	Write a program to store and display the information of student using structure
5	Write a program to add two complex numbers by passing structure to a function
	Understand the use of constructor and destructor
6	Write a program to create an employee class and manage employee data using constructor and destructor

7	Write a program to calculate the volume of a cube using constructor and destructor
	Concept of friend function and static member function
8	Write a program to add two numbers using friend function
9	Write a program to understand the concept of static member function
	Inheritance and type of inheritance
10	Write a program to understand single level inheritance
11	Write a program to understand multilevel inheritance
12	Write a program to understand multiple inheritance
	Virtual function and virtual base class
13	Write a program to calculate the total marks of a student using virtual base class
14	Write a program to calculate the average salary of an employee using virtual function

	Polymorphism (function overloading & overriding)
15	Write a program to calculate the area of different shapes (square, rectangle, circle etc) using function overloading.
16	Write a program to understand the concept of function overriding
	Implement Operator overloading concepts
17	Write a program to overload binary operator ‘+’
18	Write a program to overload unary operator ‘++’
	Understand exception handling
19	Write a program to perform exception handling for divide by zero exception
20	Write a program to perform array out of bound exception handling
	Dynamic memory allocation using new and delete operator
21	Write a program to allocate memory for a variable using new and delete memory using delete operator

22	Write a program to allocate memory for an array using new and delete memory using delete operator
	File handling techniques and operations
23	Write a program to read from a file.
24	Write a program to write into a file.
25	Write a program to read and write from a file and convert file content from lowercase to uppercase
